EXPERIENCE

Lead Frontend & AI Automation Developer — Axon Studio / buildc3.tech *Remote*

Frontend Architecture & AI Product Development *2025 – Present*

- Lead frontend development across multiple production web apps while building AI-automation systems, including LeadRadar (multi-tenant outreach SaaS) and a WhatsApp RAG agent for automated lead handling.
- Shipped browser extensions — Meow AI and Nakung AI — embedding LLM-powered assistance directly into developer workflows via Chrome Extension APIs.

Walmart USA — Advanced Software Engineering Virtual Experience Program (Forage) *Remote*

Simulated Software Engineering Projects *July 2026*

- Completed the Advanced Software Engineering job simulation, solving technical projects for multiple teams at Walmart.
- Developed a novel version of a heap data structure in Java for Walmart's shipping department, demonstrating strong problem-solving and algorithmic skills.
- Designed a UML class diagram for a data processor, accounting for different operating modes and database connections.
- Created an entity-relationship diagram for a new database, incorporating all requirements provided by Walmart's pet department.

EDUCATION

Sikkim Manipal Institute of Technology *Rangpo, Sikkim*

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) *Aug. 2024 – May 2028*

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming, Machine Learning, Probability & Statistics

PROJECTS

Cadence | Next.js, TypeScript, LLM APIs, Speech Recognition, PostgreSQL, Supabase *June 2025 – Present*

- Built and shipped a conversational language-learning platform focused on spoken fluency, using active-recall drills and real-time speech interaction instead of gamified streaks.
- Engineered a speech-to-feedback loop that captures learner audio via speech recognition and scores pronunciation and grammar with LLM APIs, returning targeted, sentence-level corrections.
- Crossed 200+ active users, driving repeat engagement through daily spoken-practice sessions and spaced-repetition progression. **Live** | **GitHub**

LeadRadar | Next.js, PostgreSQL, Supabase, Apollo.io API, Stripe, OpenAI *2025 – Present*

- Architected a multi-tenant B2B outreach SaaS, enforcing strict per-tenant data isolation with PostgreSQL Row-Level Security policies.
- Integrated the Apollo.io API for lead sourcing and enrichment, and built a scheduled outreach engine that classifies inbound replies with an LLM to auto-route hot leads.
- Implemented Stripe subscription billing with webhook-driven state sync, powering a live MRR and churn dashboard for tenant admins. **GitHub**

TalentSync — AI Career Platform | Next.js, OpenAI, Groq, PostgreSQL, Redis, Supabase, Razorpay *Aug. 2025 – Present*

- Built a full-stack AI career platform using LLMs for resume parsing, ATS scoring, and semantic job matching with end-to-end application automation.
- Engineered an ATS scoring engine over GPT models evaluating keyword density, formatting, and skills coverage, returning structured category-wise scores via prompt engineering.
- Designed a semantic matching pipeline scoring resume-to-listing relevance via embeddings (reducing irrelevant matches by 60%), and added Redis caching and rate limiting that cut database load by 45% under peak traffic. **Live** | **GitHub**

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript/TypeScript, SQL
AI/ML: LLMs, Prompt Engineering, RAG, Vector Embeddings, Generative AI, NumPy, Pandas
Frameworks: FastAPI, Spring Boot, React, Next.js, Node.js, REST APIs
Databases & Cloud: PostgreSQL, Supabase, Redis, Microsoft Azure, Vercel
Tools & Practices: Git, GitHub Actions, CI/CD, Postman, Agile, OOP, System Design

ACHIEVEMENTS & ACTIVITIES

- **Hackathon Winner — Devopia (Dell):** Secured 1st place at Devopia, a hackathon organised by Dell, building an AI-driven solution under a 24-hour constraint.
- **Startup Incubation (AIC):** Selected for the Atal Incubation Centre program; founded DietBuddy, an AI-powered nutrition assistant (dietbudy.buildc3.tech), with mentorship in AI product development.
- **Open Source & CP:** Consistent LeetCode practice in Data Structures & Algorithms and problem solving.
